

TECHNICAL DATA SHEET

EUREKA MARBLE

PRODUCT DESCRIPTION

EUREKA MARMO is a water based, polishing gel indicated for polishing and maintenance of marble surfaces, marble agglomerate and all materials containing calcium carbonate, to obtain a fast and high surface gloss. Recommended for restoring surface gloss in high traffic areas where general wear and tear results in a loss of gloss and refection over time, product supplies a deep "glass effect" to surface without leaving surface films or coatings. Product can be used as a periodic maintainer or used to correct gloss imperfections during a mechanical honing and grinding of surface. Ready-to-use formula. No additional water is required during application.

APPLICATION SURFACES

Polished marbles, marble agglomerates and natural stones.
For indoor and outdoor use.

CHEMICAL AND PHYSICAL PROPERTIES

APPEARANCE:	Gel
COLOR:	Transparent cloudy
DENSITY AT 20°C :	1,03 ≈
SOLUBILITY:	Soluble in all parts
STORAGE AT 20°C :	24 months in original packaging

HOW TO USE

ALWAYS TEST PRODUCT FIRST following the below product indications, before proceeding with complete product application. Ensure that surfaces to be treated are completely dry and clean, free of dirt, dust, grime and surface incrustations. Cover and protect all surrounding areas before proceeding with application. Remove any previous surface waxes or coatings (see our ULTRA STRIPPER) before proceeding with application.

Floors: Product is ready for use. Apply a small amount of product (30 gr or 1-2 teaspoons) to the area to be polished. Work in small areas per time (1/2 m²). Buff area using a mono brush machine (min. 2.2 HP – 150 rpm) equipped with a white felt pad with circular movements so to evenly distribute product to area. Continue to buff in wider circular movements overlapping previous sections until product is consumed completely. Reapply product until desired gloss is obtained (recommended 2-3 applications for restoring worn out surfaces; 1-2 for gloss maintenance). After polishing, remove any excess dust and residues from surface using a flat headed mop or dust mop. Rinse area using solution of water and LEM 3.

Tables and countertops: Product is ready for use. Apply a small amount of product (30 gr or 1-2 teaspoons) to the area to be polished. Work in small areas per time (0,5 m²). Buff area using a variable speed rotary polisher (min. 200-400 rpm) equipped with a white felt pad or EUREKA pad with circular movements so to evenly distribute product to area. Continue to buff in wider circular movements overlapping previous sections until product is consumed completely. Reapply product until desired gloss is obtained (recommended 2-3 applications for restoring worn out surfaces; 1-2 for gloss maintenance). After polishing, remove any excess dust and residues from surface using a flat headed mop or dust mop. Rinse area using B REFRESH TOP.

Notes: During application, product should be applied to materials with temperature between 10° and 30°C. Before application to floors with underfloor heating, turn off all heating and allow floor to cool completely before product application. Maintain product in its original container/packaging. Always test product first.

RECOMMENDATIONS

Do not dilute with water or solvents. On extremely worn-down surfaces, we suggest 3 applications of product. For general gloss maintenance 1- 2 application are sufficient. Do not apply to wet or heated surfaces. Apply product to small areas only. We highly recommend the use of our PHOENIX EH or PHOENIX ES mono brushes for the application and cleaning processes. We highly recommend our EUREKA PADS for product application which allows the product to reach the desired application level and gloss. Before use, read completely product label, technical data sheet and safety data sheet.

INDICATED COVERAGE

With 1lt of product: 30/40 m²*

(*) depending on the number of coats, texture and porosity of the surface

PACKAGING

Available in the following sizes: 1 kg, 5 kg, 25 kg.

Company with quality system
